MEDLITE TRANSPORT BASIC (MTB-10)

Stokes basket not included.

EMERGENCY MEDICAL RESCUE SLIDE IN SKID UNIT – MTB-10

Universal design to fit most make & model UTV 4x4 and 6x6 vehicles such as the Polaris Ranger, Kubota RTV900, Kawasaki Mule, John Deere Gator and a host of other off road vehicles.

Designed by Firefighters and Emergency Medical Technicians for use by all public safety agencies. This design puts the patient and the medical care attendant front and center. It is built for rough terrain to be used in all weather situations. Made of aluminum, it is rugged, rust proof and affordable. This emergency rescue skid unit is designed to quickly turn any UTV utility vehicle into a "mini ambulance".

The **MEDLITE™ Transport Basic** is designed to carry one patient on a long board or a stokes basket and one EMS attendant. The long board or stokes basket are easily attached to the unit using 10 Velcro D loop straps which are included. The attendants seat with seat belt is a fixed position seat. The MTB-10 comes with an adjustable end point so that the unit can be adjusted to accept a long board or the longer stokes basket. When it comes to off road rescues, safety and patient comfort are the key. Whether you are using it as a medical rescue or for a third passenger during search and rescues, the **MEDLITE™ Transport MTB-10** slide in skid unit should meet your needs and budget.
