Kimtek Marks Milestones in 2011

July 2011—Kimtek Corp hit the ground running in 2011! The Vermont-based maker of modular skid units expanded its presence at home and around the world, offering rugged yet affordable options for fire and medical rescue at remote sites as well as large public venues.

Sales soar. Kimtek reached the milestone of 1300 skid units sold, and orders continue to pour in for the fire and medical rescue systems renowned for custom compatibility and brand-name components such as Darley® Davey and Pacer® Pumps, Hannay Reels,® and Scotty foam systems.

Going global. Thanks to Kimtek's unique turn-key solutions and universal design, Medlite™ and Firelite™ skid units are in demand around the world, already at work aiding citizens and soldiers in Afghanistan, Australia, Brazil, Bulgaria, Canada, Italy, Romania, Russia, the Caribbean Islands, and other sites abroad.

Green solutions. Providing a breakthrough for medical service agencies forced to work in tight crowds, Kimtek introduced Medlite Transport EV, a custom skid unit designed for the new Polaris Ranger® EV which spares patients, crews, and the public from exposure to noxious fumes associated with gas-powered UTV units.

Kimtek units are designed by rescue professionals, built by rescue professionals, and proudly made in America.
